The Ján Koniarek Gallery in Trnava seeks, within its abilities, to participate in international projects that integrate Slovak artists in the events outside Slovakia.

Focus Europa is an international association of artists based in German Neudrossenfeld. It was founded in 2005. The association has its President, administration, curators and statutes. It brings together dozens of artists from several European countries without age limits. Its purpose is the international cooperation in the field of visual arts. German organizers usually compile a selection of authors and art works according to the premises offered in the respective country. So the exhibitions are site-specific.
